The President's Committee on Government Contract Compliance sent letters dated June 5th and June 6th requesting information on our contract procedures and administration. A study indicated that full response could not be made because of the serious security aspects. I recommended to DD/A that we approach the Executive Director of the Committee in an effort to be relieved of the requirements for information. I talked to Mr. Robert Granville, the Executive Director, by phone today, and he said that since he had been with the FBI he thought he understood our security problem. He wishes to talk about it, and since they will be tied up in hearings or otherwise, I am to get in touch with him on Monday, June 23rd.
